

Have you seen this..?

Dothistroma Needle Blight

Gingery discolouration of pine

Symptoms of Dothistroma on the lower parts of a young Corsican pine tree

Dothistroma affects previous years needles; younger needles remain healthy

Dothistroma banding on Corsican pine needles

You can learn more about the project and the pests and diseases we are most concerned about, please visit **www.observatree.org.uk**

If you think you have seen something unusual and would like to find out what you need to report, please visit

www.forestry.gov.uk/treealert

Observatree is a citizen science project led by Forest Research, in collaboration with key organisations

Previously 50% funded by the EU's LIFE+ Programme (2013-2017)
