

Have you seen this..?

Pine Processionary Moth

Larvae congregating on the trunk of an infested pine tree

Fresh Pine Processionary Moth nest in young pine tree

Severe defoliation damage on infested pine trees

Contact with caterpillar hairs can cause skin rashes

You can learn more about the project and the pests and diseases we are most concerned about, please visit

www.observatree.org.uk

If you think you have seen something unusual and would like to find out what you need to report, please visit

www.forestry.gov.uk/treealert

Observatree is a citizen science project led by Forest Research, in collaboration with key organisations
